

Anagha O

MERN Stack Developer

Highly skilled and motivated **ME(A)RN Stack Developer** with hands-on experience in designing and developing scalable web applications. Adept at collaborating in team environments and delivering high-quality solutions for complex technical challenges. Gained **real-world experience** through internships at Geesesquads and Luminar Technolab, where I contributed to live projects and built production-ready features using technologies like **React, Node.js, Express.js, Firebase, and MongoDB**. Passionate about leveraging modern technologies to drive innovative digital experiences.

- Developed and maintained dynamic web applications leveraging **Firebase, Express.js, React, and Node.js**.

ME(A)RN STACK DEVELOPER (INTERN)

Luminar Technolab

2024 Jul- 2025 Jan

- Developed and maintained dynamic web applications using **MongoDB, Express.js, React, and Node.js**.
- Created responsive **front-end** designs to optimize user experience.
- Implemented **back-end** services to improve overall application functionality.
- Participated in **code reviews and task planning** for continuous project enhancement.

EDUCATION

Bsc computer science

JDT Islam college of arts and science

08/2021-03/2024

SKILLS

- React
- JavaScript
- HTML
- Github
- Firebase
- MongoDB
- Node.js
- Express.js
- Tailwind CSS
- TypeScript
- Bootstrap
- Shadcn

PROJECTS

LibraryManagement App - 2024

- Developed a full-stack Library management app using **MongoDB, Express, and Node.js**
- Allowing users to browse, add, update, and delete books. Integrated a responsive frontend for easy navigation and integration

Frontend Clone of Boat Website - 2024

- Developed a responsive front end clone of the Boat website using **HTML, CSS, and Bootstrap**.
- Enhanced frontend development skills and deepened understanding of design principles and user experience.
- Proud of the project outcome and motivated to continue growing as a MERN stack developer.

Asset Manager - 2025

- Developed a comprehensive Asset Manager platform enabling asset rental, user assignment, and revenue tracking using **Firebase, Express and Node.js**
- Built a dynamic dashboard to monitor usage history, asset returns, and overdue tracking, improving operational efficiency.
- Implemented revenue tracking and analytics features, enabling clear financial insights per asset and user.
- Designed role-based access control for admin and user dashboards, ensuring secure asset operations and data access.

Staffing(Employee Handling CRM) - 2025

- Built a lightweight CRM to manage office staff profiles, roles, and daily operations efficiently.
- Enabled staff onboarding, status tracking, and task assignment with a clean and responsive UI.
- Integrated search and filter functionalities to quickly locate and manage team members.
- Streamlined communication and updates with status flags and centralized staff records.
