

Anagha O

Full Stack Developer | Software Engineer

Calicut, India | 9846136036 | oanagha93@gmail.com | [linkedin.com/in/anaghao8](https://www.linkedin.com/in/anaghao8) | github.com/oanagha

SUMMARY

Full Stack Developer with experience building scalable web applications and enterprise software solutions using React.js, TypeScript, Go, Node.js, Firebase, and SQL databases. Experienced in developing customer-facing platforms, SaaS applications, admin dashboards, and data-driven systems. Skilled in designing responsive user interfaces, integrating REST APIs, and collaborating across cross-functional teams to deliver production-ready solutions. Passionate about creating efficient, maintainable, and user-centric software.

SKILLS

React.js | JavaScript | TypeScript | GO (GoLang) | Node.js | Express.js | REST APIs | JWT Authentication | PostgreSQL | Firebase | Strapi | MongoDB | HTML5 | CSS3 | Tailwind CSS | Shadcn/ui | Bootstrap | Postman | GitHub | Lovable | Cursor AI

EXPERIENCE

Junior Software Engineer, GEESESQUADS

02/2025 – Present

- Develop and maintain scalable web applications using React.js, TypeScript, Go, Node.js, Tailwind CSS, and SQL databases.
- Build responsive and reusable frontend components following modern development standards and best practices.
- Designed and integrated RESTful APIs using Go and Node.js to support scalable business applications.
- Utilize modern AI-assisted development tools such as Cursor AI to improve development efficiency and code quality.

ME(A)RN Stack Developer Intern, LUMINAR TECHNOLOGIES

05/2024 – 01/2025

- Developed and maintained dynamic web applications using MongoDB, Express.js, React, and Node.js.
- Created responsive user interfaces and reusable components to improve user experience.
- Implemented backend APIs and database integrations to support application functionality.
- Participated in code reviews and task planning for continuous project enhancement.

EDUCATION

Bachelor of Science in Computer Science, University of Calicut

08/2021 – 03/2024

PROJECTS

Skyline Storage

- Developed and maintained customer-facing interfaces for a self-storage management platform, enabling users to browse storage unit sizes, pricing, and availability.
- Built responsive floor plan and unit listing modules with dynamic data integration from backend services.
- Developed reusable React components and optimized UI performance for a seamless cross-device experience.
- Developed administrative dashboards for managing storage units, customer accounts, reservations, and facility operations.

MAOS

- Developed the frontend for a SaaS platform designed for marketing agencies to centralize client, project, and team management.
- Built responsive and reusable UI components using React.js and Tailwind CSS.
- Created interactive dashboard for clients, project role permission and user profile.
- Collaborated with backend team on Firestore data structures for clients, projects, and tasks.

IP- Energy

- Developed a web-based assessment platform for SMEs to plan and evaluate energy projects.
- Implemented dynamic questionnaires with multiple answer formats, including text inputs, ratings, checkboxes, and conditional forms.
- Translated research concepts like Factfinding, Feasibility, and SDG alignment into an intuitive digital workflow for project assessment.
- Built responsive interfaces and structured data visualization features to support project evaluation and reporting.
